

## **NCR Expands Image-Scanning Capabilities with Imaging Business Machines to Reach Growing Multiform Market**

October 10, 2006 at 10:32 AM EDT

### **Partnership with IBML Opens Additional Capabilities to International Markets**

DAYTON, Ohio, Oct 10, 2006 (BUSINESS WIRE) -- NCR Corporation (NYSE:NCR) today announced a partnership with Imaging Business Machines, LLC (IBML), an industry leader in high-speed color document image scanning. The agreement grants NCR a preferred reseller status to market and sell the IBML ImageTrac(R) III and IV high-speed scanners and related software under the NCR iTRAN(TM) brand in select countries in Asia-Pacific, Europe, Middle East and African regions. These transport scanners are capable of managing up to 400 pages per minute and utilize IBML's SoftTrac(R), ExportTrac(TM) and DocNetics(TM) software. The agreement covers hardware, software and services.

For financial institutions and other businesses, such as government offices, retailers and insurance providers, the benefit of multiform scanning lies in removing the costs and constraints associated with location, space and time. Documents of various size, weight and composition can be captured and sorted in one pass at a high speed. This not only saves time, labor and processing costs, but the scan captures both a digital image and identifying parameters that provide meaningful data to be used for other business applications, which accelerates overall processing and improves customer service. As paper continues to become costlier and less efficient to handle and store, digital capture has experienced steady growth.

"The new additions are a logical extension to NCR's iTRAN family of robust image capture transports," said Dick Wheeler, assistant vice president of product management and marketing for NCR's Payment & Imaging Solutions group. "Both companies are leaders in the field of image-capture technology, so the product synergy delivers even greater service to our customers. For NCR, we can now provide expanded scanning capabilities for a variety of document types, such as loan and mortgage forms, credit card applications and more."

"For IBML, this agreement provides a significant growth opportunity as it will now offer the "best-in-class" high-speed document scanners to countries and markets covered through NCR's strong sales and service presence globally," said Robert Sbrissa, executive vice president of sales and marketing for IBML.

#### About Imaging Business Machines, LLC

Imaging Business Machines provides intelligent scanning technology for the most demanding document-imaging applications, including mixed documents of different weights, sizes and compositions. The company's ImageTrac(R) Scanning Platform consists of the ImageTrac scanners, SoftTrac(R) user-interface and professional services. ImageTrac scanners offer front and rear color image capture, multiple image outputs, barcode, 2D barcode, ICR, MICR and multiple sort pockets. Every day, hundreds of ImageTracs capture millions of color and bitonal images for customers in 32 countries. Access the IBML Web site at [www.ibml.com](http://www.ibml.com) for additional information.
