

NCR's Telecom and Technology Group Announces Availability of Innovative Security Solution From TrustPipe

December 1, 2014 at 9:16 AM EST

New marker-based security technology enables enterprises and SMBs to quickly identify threats to protect critical desktop assets

DULUTH, Ga.--(BUSINESS WIRE)--Dec. 1, 2014-- [NCR Corporation](#), the global leader in consumer transaction technologies, announced today that its Telecom and Technology group has begun offering TrustPipe for Business™, an innovative new security solution to help telecom clients and their SMB and enterprise customers protect critical desktop assets .

TrustPipe's technology is based on the discovery of distinctive markers, similar to markers in DNA, which identify entire classes of threats to protect associated assets.

"Protecting valuable data from threats continues to be a top-of-mind issue for businesses large and small," says Sophia Williams, VP and GM, for the Telecom and Technology group at NCR. "As a global managed services provider for TrustPipe for Business, NCR will provide our telecom clients as well as their enterprise and SMB customers with a single source to deploy and support TrustPipe's powerful software solution."

NCR Telecom and Technology provides services to eight of the top ten telecoms and networking OEMs. Through these strategic relationships, NCR helps customers quickly implement innovative solutions to drive better business outcomes. The NCR Telecom and Technology group provides end-to-end lifecycle support including design, ongoing maintenance and management of advanced ICT infrastructure multivendor solutions.

TrustPipe for Business enables customers to extend the useful life of Windows XP systems, expanding to the rest of their environment as additional operating system coverage is released. TrustPipe's innovative software is further enhanced by NCR's managed service solution which will enable customers to implement individual site licenses as well as a customized TrustCloud aligned with their existing security policies. NCR will also provide software and technical support through web and self-help options.

"Our patented marker-based security technology has been subjected to rigorous lab and real-world testing for more than two years achieving 100 percent effectiveness to date," says Kanen Flowers, TrustPipe co-founder. "NCR has tremendous Telecom market penetration supporting multiple industries to help us take our solution to literally thousands of enterprises who want an innovative way to protect their data from threats."

More information about this security solution can be found [here](#).
